Zones of Theoretical Visibility
Zones of Theoretical Visibility (ZTV) have been modelled for the 'Indicative Centreline for the Purposes of PEI Report' and for the 'Existing A303' based on a traffic height of 4m to represent heavy goods vehicles.

The proposed scheme earthworks including sections where the proposed A303 is in cutting, embankment or viaduct have been incorporated into the Digital Terrain Model to more accurately model the proposed A303 carriageway.
