

Preferred Route Announcement A47 Wansford to Sutton

August 2017

Improving the A47

The A47 is an important connection linking the cities of Norwich and Peterborough, the towns of Wisbech, Kings Lynn, Dereham, Great Yarmouth and Lowestoft and a succession of villages in what is largely a rural area.

As part of a £15.1 billion investment to improve journeys on England's major A roads and motorways, the Government announced a package of 6 schemes on the 115 mile stretch of the A47 between Peterborough and Great Yarmouth. Together, the proposals will relieve congestion and improve the reliability of journey times for drivers.

The schemes include converting almost 8 miles of single carriageway to dual carriageway and improving key junctions along the route.

Improving the A47 from Wansford to Sutton

The section of the A47 between Wansford and Sutton is still a single carriageway. This acts as a bottleneck, resulting in congestion, leading to longer journey times and a poor safety record. The proposed scheme will relieve congestion, reduce journey times, encourage economic growth and improve our customers' experience.

Scheme objectives:

- Supporting economic growth
- A safe and serviceable network
- A more free-flowing network
- Improved environment
- An accessible and integrated network
- Value for money

Public consultation

From 13 March to 21 April, we ran a public consultation to gain people's feedback on our proposals and help shape our plans at an early stage of the scheme's development.

We publicised the consultation widely, with posters, leaflets and letters to local communities and stakeholders as well as gaining coverage in the press and other media. Information was available on our website, public libraries and community halls.

There were also 3 exhibitions for the public to attend and view our plans.

Options taken to public consultation

We presented 3 options to upgrade the single carriageway to a high-quality dual carriageway between Wansford and Sutton.

The options were:

- Option 1 - dualling the existing A47.
- Option 2 - building a new dual carriageway partly to the north and also to the south of existing A47.
- Option 3 - building a new dual carriageway to the north of the existing A47.

Responses to the public consultation

Over 171 people attended the exhibitions and we received 170 responses to the consultation.

Around 86% supported the need to improve the section and agreed our proposals would be beneficial in reducing congestion and improving journey times.

Concerns were raised about access to Sacrewell Farm and the villages of Wansford and Sutton, the need for infrastructure to support the local cycling community and the potential for noise and disruption to traffic during construction.

Going forward, we will consider your concerns and responses and address them as part of the final design and construction plan.

The Preferred Route - Option 2

Having reviewed the feedback following the consultation, and completed a number of other assessments, we are proceeding with an amended version of Option 2 presented at consultation.

Option 2 solves the main traffic and safety problems along the route. It has significant advantages in terms of environmental impact when compared to Option 3 and will have less impact during construction when compared to Option 1.

Key concerns raised in the consultation have influenced an amendment to the original proposal. The new dual carriageway will be moved as close as possible to the southern edge of the existing A47 at the eastern end of the scheme. This would:

- Increase the distance from the new road to both the River Nene and the village of Sutton.
- Reduce the amount of land take required.
- Allow for the easiest connection of existing side roads to the new A47.
- Allow for most of the existing A47 to remain in place for local traffic and non-motorised groups such as pedestrians, cyclists and equestrians.

This will now be developed further before statutory consultation.

What happens next?

Our team will continue to develop the design of the preferred route, working closely with key stakeholders including local authorities, parish councils, statutory environmental bodies and the emergency services. We will also contact any affected land owners to discuss the details of the scheme and how it may impact on their property or interests.

This scheme is classed as a Nationally Significant Infrastructure Project under the Planning Act 2008. As such, we are required to make an application for a Development Consent Order in order to obtain permission to construct the scheme. The application will be made to

the Planning Inspectorate who will examine the application in public hearings and then make a recommendation to the Secretary of State for Transport who will decide on whether the project will go ahead.

Prior to the application, you will have another opportunity to have your say during a public consultation on our detailed design proposals.

More information about the Development Consent Order process can be found on the Planning Inspectorate's website:
